The Pop Down® Sink Drain

WWW.BOUNTYBRASSWARE.US

BBUX: Standard Installation

71310-##

Note: This waste fits sinks WITH or WITHOUT over-flow. This drain fits BOTH types of sinks.

- 1 Bounty Brassware Americas recommends installation by a Licensed Plumber
- 2 Check that sink drain opening is 1-5/8" minimum diameter and that the flange sits neatly in sink drain recess
- 3 Apply non-staining sealant to underside of **FLANGE (B)** sufficient to contact and seal well
Neutral cure silicone sealant is also okay. **WARNING: Oil-based Plumbers Putty may react with some finishes**
- 4 Place **FLANGE (B)** with sealant into sink opening and check that flange/sink seal is good

- 5 **THICK SINKS:** Use only one **RUBBER WASHER (C)**

THIN SINKS: Use 2 **RUBBER WASHERS (C)** on either side of **SPACER (D)**, as shown. Be sure washers are seated correctly

- 6 Carefully screw **BODY (E)** on to **FLANGE (B)** from underside of sink. Make sure **RUBBER WASHER (C)** is correctly seated in the recess on top of lower body. Do not over-tighten. Use rubber-safe lubricant if needed.

****Installation Trick:** If the bottom of the sink is a very coarse/rough casting, apply a small bead of silicone to the top of the **RUBBER WASHER (C)** to seal sink manufacturer's voids and thus create an effective seal.

- 7 Attach **TAIL PIECE (H)** to **BODY (E)** with **NUT (G)** and **TAIL PIECE WASHER (F)** in order shown

- 8 **TAIL PIECE (H)** may need to be trimmed to suit balance of waste system . P-trap and drain accessories not included

- 9 Install **Cartridge (A)**. Drain is open when flush and closed when down
